Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Korea on April 4, 2003. It is noted, however, that applicant has not filed a certified copy of the Korean application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over English JR. (U.S. Pub. No. 20030142276) in view of Jeon (U.S. Patent No. 6,439,724). English JR. teaches A reflective illuminating optical system, comprising: Polarized Beam Splitters 52 (only 52G shown) for transmitting the R, G, and B lights, respectively; first, second, and third LCoS (Liquid Crystal on Silicon) panels 50 (only 50G shown) for changing a phase of respective lights transmitted through the first, second, and third wire grid type PBSs, and reflecting the phase changed lights; and an X-prism 54 for receiving the R, G, and B lights that are reflected twice by the first, second, and third LCoS panels first, followed by the first, second, and third wire grid type PBSs, and combining the R, G, and B lights and permitting the combined lights to incident on a projection lens. Polarizer plate 176 is between the x-prism and the wire grid PBS. The applicant is directed to review figure 1. All three color paths are projected but only the green path is shown for convenience. See paragraphs 25 and 26. English JR. does not teach in figure

Art Unit: 2851

I specifically how the light is separated into red, green and blue. Jeon teaches in figures 1 and 3 that it was known to separate light into red green and blue by passing blue through a first dichroic mirror DM1 and reflecting red and green, then passing the red through a second dichroic mirror DM2 while reflecting the green component. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Jeon for the purpose of positional convenience. Any arrangement for separating the colors may be utilized to provide the appropriate colors to their corresponding modulators in such a manner that will take up the least amount of space.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
